

 **Plastica**

Blue 400 GeoBubble™ Cover

The classic blue pool cover

ECO
Friendly

- **UV Stabilised**
Specially formulated to protect against breaking down due to the harshness of the sun's rays.
- **Saves Water, Energy and Chemicals**
A solar cover reduces water evaporation and heat loss – saving valuable resources.
- **Competitively Priced**
The ideal choice for those on a budget but still in need of a quality pool cover.
- **GeoBubble technology**
The unique bubble shape has been proven to withstand both chemical and UV attack. A smooth shape and uniform thickness results in an increased expected lifespan of 25% in comparison with conventional bubble covers.

- **Eliminate Water Evaporation**

With a Plastica pool cover you will be reducing your water consumption and your water charges, as well as saving a vital natural resource. Research carried out, in collaboration with the Brighton and London Metropolitan Universities, proved that the evaporation loss in the UK for an average sized pool, 4m x 8m, is approximately 32,000 litres per year. This figure is considerably higher for hotter climates.

Eliminate water evaporation

- **Reduce Debris Contamination**

Debris such as leaves, dirt, insects and bird droppings are not only unsightly in a pool but also provide nutrients for algae and bacteria to feed on. When the pool is covered these contaminants will be kept out of the water, greatly improving the quality and appearance of the water.

Retain heat

- **Save Money**

A Plastica solar cover will save money by reducing water evaporation and saving energy. The pool cover will typically pay for itself in less than a year.

- **Warranty**

The Plastica 400 micron solar covers have a 3 year pro rata warranty.

- **Environmental Benefits**

By reducing the amount of energy needed to heat and filter your pool water, a Plastica solar cover will greatly reduce your CO2 footprint. It also conserves water and, at the end of its life, a Plastica solar cover is 100% recyclable.

Solar energy gain
